## Natural Heat from Wood Pellets

Pellets are a modern, high-density, environmentally-friendly fuel

They are made from sawdust and shavings left over from the wood working industry.

This material is compressed and bonded using the naturally occurring lignin in the wood. No chemical binders are required.

  
**ORGANIC**  
ENERGY

ÖkoFEN

- ✓ Genuine, natural wood fire without smoke and smell, safe, clean and comfortable
- ✓ Sustainable and climate-friendly fuel
- ✓ Fill once with 5 kg pellets and enjoy 3 hours of warmth
- ✓ Operates without electricity
- ✓ Ignition from above with conventional grill igniters or fuel paste
- ✓ Attachment for operation in wind or rain available if required
- ✓ Wheels on the bottom for easy movement

The gentle warmth from pellets is also gentle on the environment
